**SALUTATION:**

Dear Dr.Muhammad Yazid Jalaudin

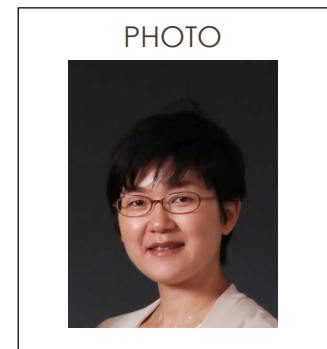

**FIRST NAME:** Atsumi

**LAST NAME (SURNAME):** Tsuji-Hosokawa

**INSTITUTION/HOSPITAL:** National Research Institute for Child Health and Development, Department of Systems BioMedicine

**SPECIALTY:** Adrenal, Sex Development

Mobile number: +81-80-5643-4694

**Brief CV**

Dr. Tsuji-Hosokawa is a pediatric endocrinologist and a molecular biologist based at National Research Institute for Child Health and Development. She received her MD and PhD from Tokyo Medical and Dental University. She completed her pediatric residency and pediatric endocrinology fellowship at Tokyo Medical and Dental University Hospital. She was involved in the newborn screening of congenital adrenal hyperplasia in Tokyo and has published several papers about its accomplishment. She served as a postdoc fellow at the University of Arizona and transferred to National Research Institute for Child Health and Development. Her main interest has been clinical research on newborn screening for congenital adrenal hyperplasia and basic molecular research for sex development.
